Amendments t the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1-21. (Cancelled)

22. (Previously Presented) A semiconductor device for driving a display section, the semiconductor device comprising:

a first input terminal to which compressed data is input;

a decoder which decompresses the compressed data;

a RAM which stores a decoded data by the decoder;

a driving section which is connected to an electrode of the display section; and

a controller which controls the decoder, the RAM and the driving section.

23. (Previously Presented) The semiconductor device according to claim 22, further comprising:

a second input terminal to which text data is input, wherein the decoded data or the text data is written into the RAM.

24. (Previously Presented) A semiconductor device for driving a display section, the semiconductor device comprising:

an input terminal to which compressed data is input;

a decoder which decompresses the compressed data;

a RAM which stores a decoded data by the decoder;

a driver which is connected to a electrode of the display section; and

a controller which controls the decoder, the RAM and the driver,

wherein the same decoded data is read out from the RAM at least two times, which the decoded data is decoded for one frame and written into the RAM.
